Key Data & Trends

INDIA

India, with its vast and diverse population exceeding 1.4 billion people, possesses a dynamic and rapidly growing economy. The country's economic landscape includes a robust services sector, notably in information technology and entrepreneurship. However, India also faces challenges such as income inequality and the need for extensive infrastructure development.

Despite these challenges, India's proactive policies and efforts to harness the potential of its youthful population are positioning it as a significant global player.

This report presents key facts and figures on India's economy and population and can thus provide a basic overview of the subject.

The report has been created as the final project for the Engeto Data Academy, held online from June 20, 2023, to September 12, 2023, by Petra Pecharová (petra.pecharova@gmail.com).
